Updated: Monday 07 June 2021

filehosting provides an easy possibility for you to send large files to your friends. Our service is completely free for everyone. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. It is also allowed to link to the download page from websites and communities. Using file, you can circumvent those limits without paying to upgrade your team chat service. You can give this download link to your friends by mail or instant messenger. Just upload the file you want to share with your friends and we send you a download link to your file. The cost ofthat data transfer is covered by your internet service or the data plan on your phone. You don't need any special software installed to be able to download yourfiles. Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phoneand our servers, then from our servers to your friends device. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, manyteam chat apps have limits to the size of files that can be transferred within their apps. There are no restrictions on the number of times a file can bedownloaded. This is easy, fast and reliable filehosting! You don't need any kind of premium-accounts. Keep your files private, or send your download linksonly to friends or family. We have no file size limit. You decide who you want to share your files with. You can upload any type of file (movies, music,documents, images, zip files and more). If only we could, we surely would! On the other hand, using file can actually save you money. Unfortunately, we can't make that part free. Files can be downloaded from any computer from our high speed servers. Alternatively you can choose to share your download links onblogs, forums and social networking sites. Any file in any format can be uploaded and downloaded for free. When you use file, you avoid storing the file you'resending in y
