Whether you choose a 4 color or 10 color, the Legacy will blow you away with its effortless rotation of both the print heads and platen arms. Utilizing 2 sets of ultraindustrial tapered barings, lathe turned center shaft and heavy wall aluminum platen arms the Legacy is built for a. The translations should not be considered exact and only used as a rough guide. The revolutionary Chameleon is the world's first DuoDeck manual silk screen printing machine. While Supplies Last. With the Genesis, you can produce highquality prints at an entrylevel expense. With a small footprint and tabletop mounting or floor stand option, the Genesis is sure to fit your shop and your budget. It can also be equipped with a vacuum pallet system for screen printing flat stock or with an extrawide screen holder and pallet for screen printing oversize and allover designs. Abacus II's servodriven indexing

system, controlled by an advanced touchscreen user interface, allows perfect positioning of virtually any digit size or type. Unlike competing athletic numbering presses, there's no question about which screen goes where in a master screen chase, nor about how to position an oversize screen containing multiple digits. With sales associates, distributors, and technicians in over 40 countries on six continents, we have the largest network of sales and support in the industry. And our technical support is available 24 hours a day, every day of the year. Wherever you are, whatever you need, we'll be there for you. Matched up with the Mini Sprint 2000 and the Red Chilis, we are able to triple our workload easily. This press is the easiest press to set up and do a large order with, and take down is a breeze. Amazing service on such a great product. Any shops out there can feel free to give us a call at 403 8873388 if you need any other reviews on this product. It's eliminated our need for film, and unlike film, digital images are easy to store and retrieve, making blownscreen replacement a snap.

Screen production is way up because we've cut exposure times by 75%. And iImage has virtually eliminated postprocessing screen touchups. We could never produce screens of this quality—or at this speed—the conventional way. Our CTS screens are unmatched. Multiscreen jobs come out perfectly registered, and since iImage ST preregisters screens for TriLoc, our entire prepress process, from screen prep to registration, has been cut dramatically. Our iImage ST will probably end up being one of the fastest returns on investment we've ever had. We've got the recipes dialed in for our inks now and it's running great. We have noticed improvements in the finish on our plastisols, too. They seem to be coming through much softer. Assuming it's because we are much more efficiently curing than with the electric curers! Usually, at the worst possible time. An instrumental partner in our success. A frantic call in the middle of the night is always met on the other end of the line by an experienced member of their service staff who expertly diagnoses my issue, and starts the process of solving our problem. No matter the age, or oddball part, the parts department makes sure I'll have what I need the next morning. My printing crew hardly misses a beat and we don't miss the deadline. We rest easy knowing people like Dan Goldberg and the rest of the service and parts departments are working hard for us behind the scenes every day. We have already put over 120,000 impressions on the machine and it is still going strong. We have found that the individual offcontact for each printhead helps with various printing techniques. Our first job was a 9color on dark apparel with a 17" print stroke and one flash. We were able to run the machine comfortably at 920 pieces per hour. The addition of the laser for print placements has saved us valuable time where we used to mark our pallets with a TSquare. The touchscreen interface is very user friendly and easy to make adjustments when needed.

[melissajacksonmd.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626bfac00dae5---97-zx7r-manual.pdf](http://melissajacksonmd.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626bfac00dae5---97-zx7r-manual.pdf)

We have not had any problems to date with the machine but are at ease knowing that all parts that we could ever need are able to be overnighted to us. Overall, we have seen an increase in our production numbers due to the efficiencies gained with the newest technology on the market. We are able to run as fast as we can clear a screen and dry our underbase. Screen printing presses will ensure all your screen prints fall in the same place on the shirt, and are absolutely necessary for doing multicolor prints. The higher the number of stations, the faster your production rate. Interested in this product? Just put the substrate on the pallet, adjust the screen to a suitable position and then apply the first image printing. Then adjust the pallet to a suitable position for applying another image printing by moving it all around because the movable pallet can be adjusted in every direction, from forward or backwards to left or right, up and down. It's very easy and convenient. For those who are just getting into the printing business, this can be their best starting point. Manufactured with highly durable materials, this equipment is designed to last. There is no maintenance needed once assembled. Our 4 Color 4 Station double Rotary Screen Press can

simultaneously install four screen plates. The screen layer is able to rotate independently and the station can rotate independently, then it is available for four colours' overprinting and making progressive proofs. This machine is total adjustable that's enable you to flexible operation. For those who are just getting into the printing business, this can be their best starting point. Manufactured with highly durable materials, this equipment is designed to last. There is no maintenance needed once assembled. Our 6 Color 6 Station double Rotary Screen Press can simultaneously install six screen plates.

Youll find a wide array of press features across a range of prices that allows you to choose the best configuration for your print shop. If you would like to investigate leasing options, [click here](#). Shown above on optional S127 stand. Twoscreen system allows for printing one or two digits in one or two colors for a great look. Print two face masks at a time with our new mask pallets. Vastex will never sell, trade or provide this information to anyone outside of the Vastex distribution channels. Occasionally Vastex will send out emails and flyers announcing new products, event reminders and other information regarding Vastex or the screen printing industry. You have the option to remove yourself from the Vastex mailing list at any time. Foil Adhesive Melt Top 10 reasons to purchase a Stahls. Hotronix heat press. Simply follow the assembly instructions and you are ready to start printing. Simply replace the print head assemblies to upgrade your press as needed. We will expose the screen and send you the completed screen and film directly to you. The Lawson Proton can also start as a 1station printing press and be expanded to a 4station speed carousel rotary screen printer.

Unlike some of our screen print competitors, youll find the Lawson Proton has many of the features of more expensive screen printing presses like the Lawson HDMAX, yet is specifically designed for the budgetconscious tshirt printer. Its small and light enough for one person to move anywhere its needed. Buy the Lawson Proton if you want a great rearclamp tshirt printer. and if you want to save money and space without sacrificing quality. Lots of optional features are available so you can customize the Proton to suit your specific textile screen printing needs. The solid base, large leveling feet and stable platform allows the user great stability. You can also just start with the Proton as a bench model, and Add the optional Floor Stand anytime you want. This can be purchaed with the original Proton, or purchased later. Lawson offers a 7Year Registration Warranty parts on the Proton. Also shown is the optional floor stand. You can also use this configuration and have 2 people printing at the same time. They simple bolt in place, and there is no need for additional machine

registration. The print heads are already registered at the factory, and are independent of the speed carousel. Easy to use and has a ton of features. We love that it is expandable and are currently in the process of expanding our press! If you want NextDay, we can save the other items for later. Order by, and we can deliver your NextDay items by. You won't get NextDay delivery on this order because your cart contains items that aren't "NextDay eligible". In your cart, save the other items for later in order to get NextDay delivery. Oops! There was a problem with saving your items for later. You can go to cart and save for later there. It can also be applied to printing on substrates which need overprinting, such as pillowcase, bag, nonwoven bags and so on.

The user can only change the pallet according to the substrates to satisfy the needs of different kinds of printing and it is easy to dismantle the pallet. This machine is specially designed for 4 color Tshirt screen printing because of its dedicated Tshirt printing which can guarantee the accurate positioning and good Tshirt printing effect. Items included 1 1 set of 4 Color Screen Press with Adjustable Pallet 006254 About This Item We aim to show you accurate product information. Manufacturers, See our disclaimer 4 Color Screen Printing Press is easy operated but with very low cost and is especially suitable for Multicolor Tshirt screen printing. Special design of screen adjusting up and down makes it easier for the user operations according to the sizes and weight of the screens, which guarantees proper intensity to avoid squeegees expelling and inks splashing in higher intensity and screen unfixing because of higher weight of screen frames and squeegees in loose intensity. It can also be applied to printing on substrates which need overprinting, such as pillowcase, bag, nonwoven bags and so on. The user can only change the pallet according to the substrates to satisfy the needs of different kinds of printing and it is easy to dismantle the pallet. This machine is specially designed for 4 color Tshirt screen printing because of its dedicated Tshirt printing which can guarantee the accurate positioning and good Tshirt printing effect. Items included 1 1 set of 4 Color Screen Press with Adjustable Pallet 006254 This is an enhanced model Precise micro adjust 4 color 4 station screen printing machine, it is an upgrade model with the function of accurate microregistration. Made of all steel plate, adopt electrostatic spraying process, more stable than common model and also hold a heavy press. This printer has a support under the pallet, could hold more heavy press when printing. Pallet bracket can make it to move back and forth within 4 inch 4 cm.
