Jon 1.0 out of 5 stars Also wrong handed will appear upside down for most right handed people. This could have been a great product but its not. Not a good buy. Also, the measurement is not from the

rear of the instrument and the rear of the instrument to the measuring groove distance is not calculated and marked. Unfortunately, the description does not make that clear. No problems with the service refunded very promptly, and no hassle return, but not what it says on the tin. It is a tape measure with a laser attached, not a laser measure. You can't hook the tape onto the end of an object. Very accurate when measuring and laser line is useful when marking out. Sorry, we failed to record your vote. Please try again.
