I was hoping to download one instead of buying one. I want to know what oil to put where and what attachments the company offered for it. I would also like to know about when it was made. Its serial number is 6299.

It seems to be a very useful machine. Any help would be greatly appreciated. Thanks, Mark M. Like yours it came with the workhead and tailstock but little else. I have to admit that Ive barely used it due to the trouble of finding or making the necessary tooling. At some point mine was converted from the flat belt drive spindle to an Excello cartridge unit so I never had to investigate lubrication for the spindle. There is an oiling hole under a screw somewhere near the center of the table for the longitudinal ways, I put regular way oil in there. Ive never seen a manual for one but its a simple machine. Mine is missing some parts from the feed mechanism and Ive never figured out what should be there. Do you think you could take a closer pic of the feed lever area between the two handwheels. Sorry I cant offer any detailed info. Hopefully you get more use out of yours than Ive gotten out of mine so far at least, I hope to make it useful at some point in the future.I have some badly water damaged manuals that even show the overhead drive. I converted mine to use a different spindle, and just use it at a surface grinder. JoshCan these grinders be used for a surface grinder. I really need a manual.I was hoping to download one instead of buying one. I want to know what oil to put where and what attachments the company offered for it. I would also like to know about when it was made. Its serial number is 6299. It seems to be a very useful machine. Any help would be greatly appreciated. Thanks, Mark M. It is a later model than the one in your pictures; it came out of a Kodak factory. I have a lot of tooling for it and the operations manual in good condition. The power feed has been disabled and someone added an electronic variable speed unit for the spindle motor.Might buy it or a Crystal grinder. JohnCan these grinders be used for a surface grinder. I really need a manual.

Mine also came with a Buck AdjustTru 6 jaw chuck but someone stole it off the machine en route to me from its source in California. I will dig up my manual and see what might be involved in scanning

it. Heres the title page Actually, you can probably still buy this manual a new copy, scanned from the original, spiral bound from my source Industrial Surplus, Inc. 337 Berlin Turnpike Berlin, Ct., 06037 Phone 860 828 3541 Fax 860 828 6747 LFLondonGive me a day or two please because Im working 16 hour days.ok. Thanks Lflondon for your help. I was wanting to see different ways to set this machine up. I just won a spindle on Ebay tonight that is labeled 13A and I hope it fits this machine. I need the mount for the right side of the spindle to drive the attachment. Could make it if I had a drawing. Thanks, MarkPlease keep posting as you get things figured out, Ill be curious to learn more about this machine. Im sure some people have used these for surface grinding but Its not ideal. The head isnt as rigid as on a surface grinder and at least on mine youd wear your left arm out from cranking real quick. The power feed is too slow for normal surface grinding. Good luck getting it up and running.If he doesnt want these, or if I dont hear from him I can offer them for sale to anybody who wants them. Send me a PM to get your place in line if you are interested.As was pointed out before, for surface grinding it is a much lighter built machine compared to a dedicated surface grinder. The arbors are smaller as are the grinding wheel mounting hubs, i.e. about 50% smaller than the former. I can find no way to lock the spindle so that can be done. I did take the belt housing off and gently put lock grips on the hub of the largest pulley, a stick through the jaws to hold to keep it from moving and was able to get by with that. Any suggestionsI was hoping to download one instead of buying one. I want to know what oil to put where and what attachments the company offered for it.

I would also like to know about when it was made. Its serial number is 6299. It seems to be a very useful machine. Any help would be greatly appreciated. Thanks, Mark M. Hope this helps you. And as you, cant find a service manual for this machine, either. The parts manual doesnt even give you the sizes of the belts that goes on it. Good luck.Practical Machinist is the easiest way to learn new techniques, get answers quickly and discuss common challenges with your peers. Twenty years ago, I decided to go into metalworking as well, in order to make the machinery and jigs that my woodworking required. Since then, I've accumulated many different machines, along with their manuals. As a selftaught craftsman, I've frequently needed manuals and books to help myself set up or operate complicated machines. That is why I started this service with my family to make hardtofind manuals easier for other craftsmen to obtain. I wanted to make the best quality, printed manuals to work with in a shop. After all, I remember the day when they didn't even have computers. We do More than Sell Manuals My son and I do metal and woodworking in our shop. We make some of the smallest inlay in the world. The duck call pictured has over 1,117 individual pieces of wood in it. You can learn more about our shop on our About Us page, or Ozarkwoodworker.com.

We also try to help others identify their machines, and share some of the knowledge we've received over the years of experience with rebuilding machines for our shop. That is why we started Ozark Shop Talk Blog to give back to the many people that have helped us learn. We are selftaught machinist and woodworkers, and we had to use the HowTo Books, and information in the manuals to learn ourselves. If your order is urgent, please contact us to arrange special delivery. Includes details of standard, modified and special machines with pictures of special fittings and accessories. A highquality reproduction. 172 pages. Wonderful 230page book published in 1900 showing the companys products, accessories and work samples. High quality reproduction enlarged to A4. 230 pages. Not a Manual, and not a Sales and Specification folder but very interesting if you have one of the following Universal Grinders, No.5 Plain Grinding machine, Surface Grinders, No. 11 Face

If you have any questions please feel free to message me. Usually I aim to ship within 1 working day. If you would like any additional photos or want to know more about this item please message me and let me know. Other factors—like placing an order on a weekend or a holiday—may end up pushing the arrival of your item beyond the estimated delivery date. It's our hope that your item gets where it's going as soon as possible, but given the factors involved, this is only an estimate. Please try again. Note this may take more time to ship. I don't know where or when it came from, but it's truly unique and appreciated! The recipient was very pleased! George Black Yellow Red with inner tray handle and lock no key Decorative If the item is not returned in its original condition, the buyer is responsible for any loss in value. Sometimes I may reuse packaging material. I can combine shipping if you buy more than 1 item, just ask for details on how will be based on weight and total value for package insurance in most cases you will just pay for the item with the highest shipping. If you buy for example 2 brooches, you will only pay shipping for 1 brooch. I usually ship on the next working day after cleared payment. Working days are Monday to Friday. Often items are shipped on the same day. Items are generally shipped with Signed For method and require a signature upon delivery. A tracking number will be provided. When items that are returned to me without being collected by the buyer only the item is refunded but not the postage cost, I do provide a tracking number so please check the tracking of your item. I am not responsible when the postman forgets to leave a card for you if you are not at home when the parcel arrives. For international countries outside the EU the customs form will be attached to the parcel. After the Brexit this will most likely be the case with EU countries. Etsy shops never receive your credit card information.

Etsy shops never receive your credit card information. You will not get spam from Fortune Island. Reserved listings are reserved for clients who have asked to reserve an item for them. A reserved listing can therefore only be bought by the person who has asked to reserve that item. If someone else buys a reserved item, the sale will have to be cancelled. If you are able to add items to the shopping cart then yes sure. Items are usually posted from England. Usually parcels are delivered in the destination countries via the local post office, in the USA this would be USPS you can use the same tracking number on the USPS website to sign up for text and email notifications about your delivery. Within the UK this would be sent Special Delivery. I have this on some of my listings already. For small items this is around 7. Internationally I may use FedEx, UPS, DHL or another courier for sending items Express. To the USA Express would be usually via FedEx and could arrive as early as within 24-48 hours of when the parcel gets collected from here. Men's Traditional Shaving. Retro Bakelite Safety Razor.
